### **DETAILED ACTION**

#### **Election/Restrictions**

Applicant's election with traverse of Group II in the reply filed on April 18, 2005 is acknowledged. The traversal is on the ground(s) that the Examiner has not carried the burden of providing sufficient reason to support the claims are patentably distinct. This is not found persuasive because the inventions are distinct (i.e. one group is a composition and one group is a method of using) and independent from each other; thus, separate searches would be required.

Claims 1-3 and 5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on April 18, 2005.

The requirement is still deemed proper and is therefore made FINAL.

#### **Claims Pending**

Claims 1-3 and 5 are withdrawn from consideration. Claim 4 will be examined on the merits.

#### **Claim Rejections - 35 USC § 112**

Claim 4 is rejected under 35 U.S.C. 112, first paragraph, because the specification does not reasonably provide enablement for preventing aging of the skin. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

Undue experimentation would be required to practice the invention as claimed due to the quantity of experimentation necessary; limited amount of guidance and limited number of working examples in the specification; nature of the invention; state of the prior art; relative skill level of those in the art; predictability or unpredictability in the art; and breadth of the claims. *In re Wands*, 8 USPQ2d 1400, 1404 (Fed. Cir. 1988).

Applicant's claims are broadly drawn to preventing aging of the skin. The specification is not considered to enable this use. Applicant's specification does not give any examples that show

Art Unit: 1654

preventing aging of the skin. Applicant has not demonstrated inhibition or treatment of preventing aging of the skin. Applicant does not discuss the known means for preventing aging of the skin. Thus, Applicant does not provide enough information for a person of ordinary skill in the art to determine without undue experimentation what is claimed is able to prevent aging of the skin.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention.

In claim 4, line 2, the term "enhancing" is indefinite because it is not clear what is encompassed by this term. Clarification is needed.

Claim 4 provides for the use of method, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process Applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 4 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1654

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Nishibe (JP 2000178168 A- translation provided).

Nishibe (JP 2000178168 A-) disclose that *Schisandra chinensis* is used in a composition for providing skin with elasticity, improving the aging of the skin and reducing wrinkles. However, Nishibe does not discuss the mechanisms of the claim but are inherent because the same composition is applied for the same purpose. Thus, Nishibe meet the limitations of claim 4 and thus anticipates the claimed invention.

Summary

No claim is allowed.
